

ADITYA BHAMRE

Senior Data Engineer

Pune, India | Mobile: +91 9370797455 | Email: adityabhamre27@gmail.com | LinkedIn: linkedin.com/in/adityabhamre

SUMMARY

Senior Data Engineer with a master's in data science and 4+ years of experience architecting scalable ETL pipelines, massive cloud migrations, and high-throughput data platforms. Specializes in leveraging Databricks, Delta Lake, and Agentic AI workflows to drive enterprise data transformation and operational efficiency.

TECHNICAL SKILLS

- Big Data & Orchestration:** ETL / ELT, Apache Spark, PySpark, Databricks, Delta Lake, Apache Airflow, Informatica (IICS)
- Databases & Storage:** Snowflake, MySQL, Oracle, MongoDB, IBM Netezza
- Cloud & CI/CD:** AWS (S3), Azure (Synapse), Git, GitHub, Bitbucket
- Languages:** Python, SQL
- Data Architecture & AI:** Agentic AI, Prompt Engineering, Databricks Genie

PROFESSIONAL EXPERIENCE

ZS Associates | Pune, India

Business Technology Solutions Associate Consultant (Data Engineer) July 2025 – Present

- Datroway (Agentic AI Optimization):** Architected an Integrated Data Layer (IDL) on AWS S3 and Databricks, orchestrating complex workflows via Apache Airflow. Integrated Databricks Genie using advanced prompt engineering, slashing client data retrieval time by 80% - reducing 10-hour processing cycles to 2 hours, and boosting overall analytics efficiency by 57%.
- Imfinzi (High-Volume Pipeline Architecture):** Engineered a high-throughput pipeline to process and transform 70TB+ of complex healthcare data for a Top-10 Global Pharmaceutical Enterprise. Configured specialized Genies to automate insights on brand performance, market share, Duration of Therapy (DoT), and regulatory compliance.
- Alexion (Commercial Data Product):** Engineered a highly scalable Commercial Data Product in Snowflake, modernizing legacy infrastructure via AWS S3. Refactored core business logic and optimized crucial KPI identifiers, significantly enhancing commercial reporting accuracy.
- Leadership & Execution:** Directed a 4-member technical pod through rigorous code reviews and sprint planning. Ensured 100% on-time project delivery while driving a 40% improvement in overall data pipeline operational efficacy.

Capgemini | Pune, India

Senior Analyst / Software Engineer Dec 2021 – July 2025

- Regulatory & Finance Reporting (DNB Bank):** Built GDPR-compliant ETL pipelines via IBM DataStage and Teradata, transforming data into XML and leading SIT/UAT to resolve complex discrepancies and ensure continuous audit readiness.
- Data Migration & Pipelining (Volvo):** Architected Azure Synapse and Netezza, ETL workflows using IICS, boosting processing efficiency by 25% and migrating 30TB+ of data to Azure with zero data loss, cutting delivery timelines by 15%.
- Awards & Leadership:** Recognized as 'Rising Star' (2022, 2023) for technical excellence. Mentored 60+ peers as President of the internal "Freshers' Club".
- ADAPT Program:** Completed the ADAPT program, developing foundational skills in big data tools, ETL processing, and Agile workflows, resulting in preferential full-time onboarding.

PROJECTS

Cyberbullying Detection Using BiLSTM:

- Built a Cyberbullying Detection System using TensorFlow/Keras with BiLSTM architecture, achieving 82.3% accuracy.
- Published findings in IJRASET (Paper ID: IJRASET60420, Volume 12, Issue IV, Apr 2024).

ETL Pipeline Optimization:

- Automated critical data integration pipelines via Informatica to streamline workflows across distributed enterprise systems. Reduced manual production intervention requirements by 40% while significantly improving pipeline fault tolerance and system scalability.

EDUCATION

- Master of Engineering in Data Science – Savitribai Phule Pune University (2024, CGPA: 9.32)
- Bachelor of Engineering in Computer Science – Savitribai Phule Pune University (2022, CGPA: 9.34)

CERTIFICATIONS

- Databricks Certified: Associate Data Engineer
- Microsoft Certified: Azure Fundamentals (AZ-900)
- MongoDB SI Architect Certified
- Data Engineer-Data Integration-IICS (Ocean Certified)
